

## NEWSLETTER NO. 1 – JULY 16, 2019

### Field Work for the Design of Berford St., Gould St., Pengally Ave., Elm St., Brown St., Mary St., Division St. & William St. Streetscape and Servicing Improvements in the Town of Warton, South Bruce Peninsula

The Town of South Bruce Peninsula has entered into a contract with R.J. Burnside & Associates Limited (Consulting Professional Engineers) for the reconstruction of various streets in the Town of Warton within the limits as noted on the map below. The work generally consists of the replacement of storm and sanitary sewers and services, watermain and water services, sidewalk, curb and gutter, etc., as required. The roads will also be improved through changes in road base materials, asphalt and possibly vertical and horizontal alignments. Berford Street will be fully reconstructed including streetscaping improvements, street lighting and traffic signal upgrades as outlined in the Town's approved Warton Streetscape Design Concept (2016).

Field work such as topographic and legal surveys, geotechnical investigations, underground utility locates and other work necessary for the design of the works is expected to start late-July and completed mid-September 2019.

R.J. Burnside & Associates Limited and its sub-consultants will be on-site performing many of the above noted tasks within the Town right-of-way. Except for some non-invasive topographic survey, work is not expected to encroach onto private property.

R.J. Burnside & Associates Limited and its sub-consultants are committed to provide the necessary signage and traffic control to maintain pedestrian and motorist safety and mobility.

#### Will I Have Access To My Home Or Business?

Yes, R.J. Burnside & Associates Limited and its sub-consultants will maintain access to your home and business at all times. Clear unobstructed entrances shall be maintained to all dwellings and businesses. Emergency vehicular access will also be maintained at all times.

#### How Will My Services Be Affected?

Telephone, hydro, water, cable TV, sewer and gas services should not be affected by the field work, barring any unforeseen circumstances.

#### Safety

R.J. Burnside & Associates Limited and its sub-consultants are required to conduct the work in a safe manner including delineation, if required, of the work area, etc. We ask that you take extra caution during the geotechnical investigation phase of the works as a drilling machine will be drilling for soil samples and one lane of traffic may be affected. The Geotechnical sub-consultant will provide safety and traffic control measures to ensure everyone's safety.

#### Public Outreach

A copy of this newsletter will be available on the Town website ([www.southbrucepeninsula.com](http://www.southbrucepeninsula.com)) and available by email upon request to [paul.hausler@rjburnside.com](mailto:paul.hausler@rjburnside.com). Communication with the Community will be ongoing as the project progresses through the various stages of design.

#### Who Do I Call If I Have A Question?

R.J. Burnside & Associates Limited have designated a "Project Manager" to respond to public inquiries related to this project. The Project Manager should be your first point of contact regarding any concerns. You may call or email the Project Manager at any time during the hours of 9:00 a.m. to 5:00 p.m., Monday to Friday, and your call will be responded to as soon as possible. The Project Manager's phone number and email address is provided below.
