MAPLEPORT CRESCENT RECONSTRUCTION
SAUBLE BEACH
TOWN OF SOUTH BRUCE PENINSULA
STAGE 1 - PLANNING AND DESIGN

Mapleport Crescent Reconstruction

The Town of South Bruce Peninsula has engaged GM BluePlan Engineering Limited (Consulting Professional Engineers) to plan and design the reconstruction of Mapleport Crescent in Sauble Beach. The work generally consists of the replacement of the watermain and water services, and the road base materials, asphalt, ditches, and driveway entrance culverts.

As part of the project planning and pre-engineering design, field work such as topographic and legal surveys, geotechnical investigations, underground utility locates and necessary investigations is expected to start in June 2014 and be completed by September 2014. Construction is not anticipated until 2015, at the discretion of Council.

GM BluePlan Engineering Limited and its Sub-Consultants will be on-site performing many of the above noted field works within the Town Right-of-Way which, except for some non-invasive topographic survey work, will not encroach onto private property.

How Will This Affect Me?

For this stage of the project residents will see survey technologists collecting topographical information and a truck-mounted drillrig drilling five to six boreholes around the Crescent, which is expected to take about one day.

Access to your home will be maintained at all times. Road access may be reduced to a single lane during geotechnical drilling operations.

Access for emergency vehicles will be maintained at all times.

Will My Services Be Affected?

Telephone, hydro, water, cable TV, and gas services should not be affected by the field work, barring any unforeseen circumstances.

Safety

GM BluePlan Engineering Limited and its Sub-Consultants are required to conduct the work in a safe manner, including delineation, if required, of the work area, etc. We ask that you take extra caution during the geotechnical investigation phase of the works as a drilling machine will be drilling for soil samples and one lane of traffic may be affected. The Geotechnical Sub-Consultant will provide safety and traffic control measures to ensure everyone's safety.

Notices

Additional notices will be provided as the project progresses through the design phase and prior to construction.

Who Do I call If I Have a Question?

GM BluePlan Engineering Limited has designated a "Project Manager" to respond to public inquiries related to this project. The Project Manager should be your first point of contact regarding any concerns. You may call or email the Project Manager at any time during the hours of 8:00 a.m. to 5:00 p.m., Monday to Friday, and your call will be responded to as soon as possible. The Project Manager's phone numbers and email address is provided below.
