Notice of Study Completion

Municipal Class Environmental Assessment for Upgrading the Warton Wastewater Treatment Plant

The Town of South Bruce Peninsula is proposing to upgrade the Warton Wastewater Treatment Plant (WWTP) from its current capacity of 2500 cubic metres per day to 4400 cubic metres per day to allow for future growth in the community of Warton.

The project is being conducted in accordance with Schedule C of the Municipal Class Environmental Assessment process (October 2000, amended 2007 and 2011), which is approved under the Ontario Environmental Assessment Act. The Class EA process involves consultation with the public and review agencies to ensure that the project can be carried out in an environmentally-sound manner. The environmental assessment process has now been completed.

An Environmental Study Report (ESR) documenting the Class EA process will be available for public review at the Town of South Bruce Peninsula's municipal office at 315 George Street, Warton, during normal hours of operation. A copy of the ESR will also be posted on the Town's website at

www.southbrucepeninsula.com/en/townhall/specialprojects.asp

If environmental concerns arise regarding this project, which cannot be resolved in discussion with the Town of South Bruce Peninsula, a person or party may request that the Ministry of Environment and Climate Change make an order that the project comply with Part II of the Environmental Assessment Act, which addresses individual environmental assessments. Requests must be received by the Minister, at the address below, by May 31, 2015. A copy of the request must also be sent to the Town and consulting engineers at the address noted. If no such request is received by May 31, 2015, the project will proceed to implementation as outlined in the ESR.
