Claude and Brown Street Reconstruction Sanitary Sewer, Watermain and Associated Work Construction Update Newsletter #3

September 26, 2014

As a follow-up to our previous newsletters, we have been replacing the sanitary and storm sewers on Claude Street from the intersection of Claude Street and Mary Street to the intersection of Claude and William Street, including individual services. Road base reconstruction will start the week of September 29th, 2014.

In preparation of the Contractor moving to Brown Street and starting reconstruction near William Street, we need to ask for the cooperation of the business and residents on Brown Street. Individual water and sanitary services will be replaced to the property line of every residential and commercial property. While every attempt will be made to minimize the disruption, we cannot guarantee that all private belongings on Town property can and will be maintained or replaced. Should you have a fence, flowers, garden features, signs or any other item on public right of way it may need to be removed and the contractor will not replace it. The contractor is responsible to restore curb, sidewalk and grass boulevard only.

A general guideline to use is that property line is approximately 3m behind the curb. Should you require assistance in determining where the property limit is, please contact the Town of South Bruce Peninsula and we will come to your property and show you approximately where the limit is.

Every attempt will also be made to maintain access to your property especially after hours but alternative parking may be required during the day. We apologize for this disruption but it is part of the reconstruction process. Pedestrian access will also be maintained however it may be limited to one side of Brown at a time.

Starting Monday, September 29th, work is planned to proceed on the Claude and Mary Street intersection. This intersection will be closed to all traffic. Detours will be set out to ensure that traffic flow to the hospital is maintained. Local residents are requested to access their homes from the appropriate end of the block.

Thank you to all of the people affected for your patience during this disruption.
