Warton Water Tower Repainting

September 24, 2013

The Town of South Bruce Peninsula has hired a specialized company to repaint the interior of the Warton water tower. The work is scheduled to take place from late September until early November. Both the Town and the Ontario Clean Water Agency (OCWA) are working together to make the work as seamless as possible and users on the water system should not notice any change in flow or quality of water while the tower is being recoated.

If municipal water users notice any change in flow or colour of their water, please contact OCWA at the Warton Water Treatment Plant at 519-534-1610 to report your issue.
